CARRIER OBJECTIVE

Enthusiastic and detail-oriented MERN Stack Developer with strong expertise in backend development using Node.js. Adept at building full-stack web applications, developing scalable APIs, and ensuring robust server-side logic. Passionate about writing clean, efficient code and delivering high-performance, user-focused solutions. Seeking an opportunity to contribute technical skills and problem-solving abilities in a dynamic development environment.

EDUCATION

BS Computer Systems Engineering

University of Engineering & Technology, Peshawar. CGPA: 3.2

Peshawar, Pakistan

Nov 2021 - Aug 2025

FSC Computer Science

Government Degree College Kohi Sher Haider Bara. Grade: A1

Bara Khyber, Pakistan

August 2019 - Jun 2021

SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, HTML, CSS, SQL.
 - **Frameworks:** Node.js, express.js, react.js, next.js, Bootstrap, Tailwind CSS
 - **Tools:** VS Code, Git, GitHub, Postman, MongoDB Compass, MySQL Workbench, Jira, Slack
 - **Libraries:** Mongoose, Sequelize, Material UI
 - **Platforms:** MongoDB Atlas, MySQL, AWS (EC2, amplify, S3), Netlify, Vercel, Heroku, Render.
-

WORK EXPERIENCE

- **MERN Stack Developer at Quantum Tech Academy** January 2022 – July 2023
 - Develop, maintain, and deploy full-stack web applications using the MERN stack
 - Collaborate with front-end and back-end teams to create user-friendly and efficient applications.
 - Implement data management solutions and user authentication processes for scalable, secure apps.
 - Ensure responsive design and optimal user experience (UI/UX) across various devices.
 - Integrate and manage RESTful APIs for real-time data handling and dynamic features.
 - Optimize performance, security, and scalability of applications in the Agile development environment.
- **Backend Developer at Quantum Tech Academy** January 22 – July 23
 - Integrated MongoDB and MySQL, ensuring efficient data handling.
 - Built and optimized RESTful APIs with Node.js and Express.js.
 - Design and implement APIs, handle server-side logic, and manage databases.
 - Improved server performance by optimizing database queries and reducing response times.

- **Full Stack developer at Terapage**

September 2025 – Till

- Integrated MongoDB and MySQL, ensuring efficient data handling.
 - Built and optimized RESTful APIs with Node.js and Express.js.
 - Design and implement APIs, handle server-side logic, and manage databases.
 - Improved server performance by optimizing database queries and reducing response times.
-

VOLUNTEER WORK EXPERIENCE

- **Finance Minister at Nojawan Hamdard Committee Bara**

April 2020 – Till

- The Nojawan Hamdard Committee (NHC) is a youth organization.
- Works to promote social welfare and education.

- **General member at Bara Educational Society Bara Khyber agency**

August 2019 – Till

- A chain of shining students, BES (Bara Educational Society)
 - has Objective of bringing Awareness to people to spread education and provide service to society
-

PROJECTS

- **Travelnest MERN Stack Project | [LINK](#)**

September 2024 – December 2024

- Developed for online booking hotel's rooms.
- I used MVC architecture for building wanderlust project.
- Used Cloudinary third party cloud services for storing images and files

- **Weather APP (React js project) | [LINK](#)**

August 2025 – August 2025

- I explored React js concepts such as component rendering, hooks, state lifting etc.
- Created client-side routing and authentications.

- **Lottery Game (React js project) | [LINK](#)**

- I use React hooks and implemented functional programming.
- I explored component life cycle and the concept of rendering components.
- Created client-side routing and authentications

- **GitHub Clone (MERN Stack) | [LINK](#)**

April 2025 – May 2025

- I used yargs package to read terminal commands.
 - I used bcrypt (hashing) and jwt for authorizations and authentications.
 - I used react.js client-side routing, hooks etc.
-

CERTIFICATES

- **Angular Fundamentals: Building Responsive Web Apps with Ease (EDUCBA)** | [LINK](#) **January 2025**
 - Learned core Angular concepts like components, modules, and services.
 - Built responsive single-page applications using Angular CLI.
 - **Introduction to Front-end Development with ReactJS** | [LINK](#) **February 2023**
 - I understood key React concepts like components, props, and state management.
 - I built interactive user interfaces using JSX and component-based architecture.
 - **APIs in Node.js: Write a RESTful API Backend Application** | [LINK](#) **February 2023**
 - I used React hooks and implemented functional programming.
 - I explored component life cycle and the concept of rendering components.
-
